Notification Category:	Product Notification
Target Audience:	CLECs, Resellers
Subject:	CMP – Caller ID Blocking – V4.0
Level of Change:	Level 1 and 3

Summary of Change:

On February 25, 2003, Qwest will post planned updates to its Wholesale Product Catalog that include new/revised documentation for Caller ID Blocking – V4.0. These will be posted to the Qwest Wholesale Document Review Site located at <http://www.qwest.com/wholesale/cmp/review.html>.

Updates include:

- A modification/change to an existing manual process in the Ordering section. Information has been modified to specify that for UNE-P and UBS services, NKM and NKS USOCs provide identical Caller ID Blocking functionality and either USOC may be used to provide Caller ID Blocking functionality on compatible UNE-P and UBS services in all states. NOTE: Until this proposed change becomes operational, the NKM USOC should be used when ordering this feature.
- Corrections/clarifications/additional information that does not change the product/process in the in the Product Description and Rate Structure sections. Rate information has been moved from Product Description and has been modified to identify that only Retail and Resale end-users may qualify for Caller ID Blocking per line at no charge. This update clarifies that qualifications for Caller ID Blocking at no charge do not apply to UNE-P and UBS.
- Corrections/clarifications/additional information that does not change the product /process in the Ordering section. The state specific USOC table has been changed to clarify that it applies to Retail and Resale only.
